LA UFO Sighting #1066

2023 JULY 30 - 15:11:00 GMT-5

LA, UNITED STATES

It was a quiet Saturday evening in Los Angeles. I had just finished a late dinner with friends and decided to take a stroll along Santa Monica Beach to enjoy the cool breeze and the calming sound of the waves. Little did I know, I was about to witness something extraordinary.

Around 10 PM, as I was walking near the pier, I noticed a cluster of bright lights hovering above the ocean. At first, I assumed they were helicopters or planes, given the proximity to LAX. However, these lights were different—they moved in a way that defied all conventional aviation patterns.

The lights formed a perfect triangle and hovered silently above the water. Intrigued and a bit uneasy, I stopped and watched closely. The lights were incredibly bright, illuminating the surrounding sky and casting an eerie glow on the water below.

As I stood there, other beachgoers began to notice the phenomenon as well. A small crowd gathered, and the air buzzed with murmurs of confusion and excitement. I took out my phone and started recording, hoping to capture what was unfolding. Suddenly, the lights began to move in unison, performing maneuvers that seemed impossible for any known aircraft. They shot straight up, then descended rapidly, only to zip across the horizon at incredible speeds. The movements were so fluid and precise that it was clear this was not a random occurrence but something controlled and deliberate.
