New York UFO Sighting #24032

2023 FEB 22 - 19:02:00 GMT-5
NEW YORK, UNITED STATES

It was a typical Wednesday evening in Brooklyn. I had just finished dinner and decided to take my dog, Max, for a walk along our usual route through Prospect Park. The air was crisp, and the park was relatively quiet, with only a few other people out enjoying the clear, starry night. Little did I know, this ordinary evening was about to take an extraordinary turn.

As we strolled past the park's north side, I noticed a strange light in the sky. At first, I thought it was an airplane, but something about it seemed off. The light was too bright, and it wasn't moving in a straight line like a plane should. Instead, it zigzagged erratically, then hovered in place, almost as if it was observing the area. Curious and a bit apprehensive, I stopped walking and focused on the light. It was then that I realized it wasn't just one light, but a series of lights arranged in a triangular formation. The lights were a vibrant, almost hypnotic blue and white, casting an eerie glow on the park below.
